

Engineers – Intelligent Transportation Systems

JOB TYPE: Permanent
LOCATION: Sandyford, Dublin 18
SALARY: Dependent on experience

Following recent success, we are seeking to strengthen our Transportation team through the appointment of ITS engineers who will work on Transport Infrastructure Ireland projects.

ROLE: Working in an integrated team of engineers and ITS specialists, you will be provided with the opportunity to work on innovative ITS projects for the Irish road network, liaising daily with our client. The successful candidates will take a lead role in the development of ITS schemes design and specification and the procurement of associated works and supply contracts.

CANDIDATE REQUIREMENTS

- Level 8 degree in relevant engineering discipline
- 3+ years post graduate experience in engineering sector
- Knowledge of relevant design standards
- Excellent report writing and verbal communication skills
- Has undertaken ITS technical studies and reports
- Designed and deployed ITS projects from planning through to commissioning
- Ability to manage projects within programme and budget constraints
- Knowledge of IT software/technologies
- Understanding of the principles of asset and fault management systems
- Knowledge and understanding of wired & wireless communications
- Excellent attention to detail and organisational skills
- Flexible, motivated and innovative with a desire to learn and develop
- Fluent/highly proficient in spoken and written English

DESIRABLE

- Membership of recognised professional body in the engineering sector
- Ability to establish & maintain interfaces with other engineering disciplines
